Objective	Aspiring Full-Stack Web & Flutter Developer seeking to leverage my skills in React.js, Node.js, Flutter and SQL database to build efficient, responsive, and user-friendly web and mobile application, while contributing to innovative projects and growing in a dynamic development team.
Skills & Abilities	**Frontend**: React.js, Next.js, HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript **Backend**: Node.js, Express.js, Strapi, Firebase (Authentication, Firestore) **Mobile Development**: Flutter, Dart **Databases**: SQL, MongoDB **Tools & Libraries**: Axios, React Router DOM, React Hook Form, Vercel **Networking**: VLAN, DNS, DHCP, Routing, Cisco Packet Tracer **Version Control**: Git, GitHub **Other Skills**: Responsive Design, REST APIs, JSON, UI/UX fundamentals
Experience	**Personal Portfolio Website – Full-Stack Web Developer** React.js, Tailwind CSS **|** 2025 - Designed and develop a dynamic, **multi-page portfolio** showcasing skills, experience, projects, and contact details. - Implemented **reusable React components**, client-side routing, and **responsive layouts** for cross-device compatibility. - Optimized performance and maintained a **scalable, clean folder structure** following best practices. - Deployed the project on **Vercel** with GitHub-based version control and CI workflow. **Spray Center Website – Full-Stack Web Developer** React.js, Node.js, SQL, Tailwind CSS **|** 2025 - Developed a **responsive business website** for a spray shop with service listings and product showcases. - Built and integrated **RESTful backend APIs** for products, bookings, and service management. - Implemented **CRUD operations, routing, reusable components, and state management** in React. - Structured the application for **scalability, maintainability, and clean separation of concerns**. **Kids Learning App – Flutter Developer** Flutter, Firebase Authentication, Firestore **|** 2025 - Built an **interactive learning application** for children with lessons, quizzes, and engaging UI elements.

	- Integrated **Firebase Authentication** for secure access and **Firestore** for real-time data storage. - Implemented **multi-screen navigation, basic animations, and user-friendly layouts**. - Followed **modular Flutter architecture** to support future feature expansion.
Education	**Bachelor of Software Engineering** Superior University Lahore – Gold Campus, Lahore, Pakistan. 2023 – 2027 | 7th Semester CGPA: 3.34
Communication	Communication technical concepts clearly during project discussions and presentation. Collaborated effectively with team members to plan, develop, and deliver projects on time. Demonstrated strong verbal and written communication in documentation and reporting. Actively listened to feedback and incorporated suggestion to improve project outcomes. Maintained professional communication with peers and supervisors in academic and project environments.
Leadership	Led small teams in academic and development projects. Coordinated tasks to meet project deadlines. Took initiative in problems-solving and decision-making. Guided team members on technical tasks when needed.
